SUMMARY

Senior Mobile Application Developer with 6+ years of experience delivering 10+ production Flutter applications across fintech, insurance, sports, and e-commerce. Specializing in clean architecture, BLOC-based state management, and CI/CD automation. Proven track record of leading engineering teams, mentoring developers, and shipping apps serving thousands of users on both iOS and Android.

PROFESSIONAL EXPERIENCE

05/2025 – Present

Senior Mobile Engineer (Flutter) — NTG (Client: AL Rajhi Takaful)

- Contributing to the development and enhancement of AL Rajhi Takaful's flagship insurance mobile application, serving a wide customer base across iOS and Android.
- Collaborating closely with product, backend, and QA teams to translate complex insurance requirements into intuitive user experiences.
- Ensuring high standards of performance, stability, and security for customer-facing financial and insurance services.
- Participating in architectural decisions, code reviews, and continuous improvements to maintain a robust and maintainable codebase.

12/2023 – 05/2025

Senior Mobile Engineer (Flutter) — Mozare3

- Led the development of core mobile features for agricultural platforms, improving field force efficiency and user experience.
- Implemented CI/CD pipelines and e-commerce features, streamlining operations for farmers across Egypt.
- Ensured high performance, reliability, and security for user and financial data.

01/2023 – 12/2023

Senior Mobile Engineer (Flutter) — MakanE

- Led the development and revamp of high-performance mobile applications serving a diverse merchant network.
- Conducted code reviews, mentored engineers, and maintained code quality across the project.
- Implemented native integrations to extend app capabilities when needed.

06/2021 – 01/2023

Software Engineer (Flutter) — *Openner.vc*

- Spearheaded the development of a high-quality mobile app built from scratch using Flutter and Dart.
- Managed project schedules, ensuring timely software delivery, and recommended key enhancements to improve usability.

05/2020 – 06/2021

Software Engineer (Android, Flutter) — *Watanya Company for Roads*

- Developed industrial mobile applications, including a ticketing Android app using Java.
- Explored various cross-platform tech stacks, selecting Flutter for its versatility.

02/2019 – 05/2020

Software Engineer (Android, Flutter) — *Dexef ERP System*

- Designed UI components, integrated APIs, and optimized ERP system performance using Flutter.
- Revamped native apps, improving functionality and performance.

KEY PROJECTS

Al Rajhi Takaful — *Insurance & Digital Services Platform*

★ 500K+ downloads | 4.4 ★ App Store (3.4K ratings) | 4.2 ★ Google Play (17K+ reviews)

- Contributed to the development and enhancement of a large-scale insurance application serving thousands of users.
- Worked on user-facing features related to policy management, digital services, and claims experience.

Tech: Flutter, BLOC, RESTful APIs, Clean Architecture | **Platforms:** iOS, Android

Digital Hockey — *Sports Fan Companion App*

★ Official companion app for HC Ambri Piotta | Live streaming & monetized fan engagement platform

- Implemented BLOC state management and clean architecture for scalable development.
- Integrated RevenueCat for in-app purchases and secure payment gateways.
- Enhanced user experience with real-time chat, live match updates, and dynamic animations.

Tech: Flutter, BLOC, Socket.io, RevenueCat, Go Router | **Platforms:** iOS, Android

Qoodz — *Dining Discount & Offer Network*

★ 4.4 ★ App Store | Connecting users to restaurant networks across UAE with QR-based discounts

- Revamped the application and implemented new features to improve UI/UX and user engagement.
- Optimized app performance and ensured smooth QR code-based discount redemption.

Tech: Flutter, BLOC, Firebase, Payment Gateway, Sentry | **Platforms:** iOS, Android

Qoodz Manager — *Partner Redemption App*

★ B2B companion app powering promo code redemption for restaurant and café partner network

- Led the revamp of the partner app, optimizing the promo code redemption process.
- Continuously added new features to enhance usability for restaurant and café partners.

Tech: Flutter, BLOC, Firebase, Payment Gateway, Dio | **Platforms:** iOS, Android

JKS Portal — *International School Portal*

★ 5.0 ★ Google Play | Serving Jeddah Knowledge International School community

- Developed a comprehensive portal app for students, parents, and staff, facilitating seamless communication and access to school services.

Tech: Flutter, Clean Architecture | **Platforms:** iOS, Android

Farmer App — Contract Farming System

★ **10K+ downloads** | **Supporting contract farming operations across Egypt via Mozare3's agri-fintech platform**

- Revamped the codebase for improved quality and maintainability.
- Implemented key features including user balance, e-commerce, analytics, and CI/CD.

Tech: Flutter, GetX, Dio, Retrofit, Clean Code, DI | **Platforms:** iOS, Android

InGame — Gamified Platform for Football Fans

★ **100K+ downloads** | **4.1 ★ Google Play (749 reviews)** | **Regional football prediction platform**

- Designed innovative gameplay mechanics using Flutter, BLOC, and MVVM.
- Led the team through production to deliver a polished app with GraphQL and REST API integration.

Tech: Flutter, BLOC, MVVM, GraphQL, REST APIs | **Platforms:** iOS, Android

Mahallat Jo — Deals & Savings App

★ **Expanded merchant deals network serving users across Jordan**

- Led new feature development including search functionality and notifications system.
- Optimized app performance and expanded merchant network capabilities.

Tech: Flutter, BLOC, Firebase | **Platforms:** iOS, Android

Dexef Bills — Cloud-Based Point of Sale System

★ **4.3 ★ Google Play** | **Cloud POS streamlining inventory and transaction management for businesses**

- Developed a real-time inventory and transaction management system with integrated APIs.

Tech: Flutter, Dart, REST APIs | **Platforms:** iOS, Android

EDUCATION

Bachelor's Degree in Computer Science

Minufiya University

CERTIFICATIONS

Android Developer Nanodegree — Udacity

TECHNICAL SKILLS

Mobile Development

Flutter, Dart, Java, Kotlin, Android

State Management

BLOC, RiverPod, Provider, GetX

Architecture

Clean Architecture, MVVM, OOP, Design Patterns, Dependency Injection

APIs & Networking

RESTful, GraphQL, Dio, Retrofit, Socket.io

Testing

Unit Testing, Widget Testing, Integration Testing

CI/CD

CodeMagic, GitHub Actions, Fastlane

UI/UX

Material Design, Custom Animations, Localization

Tools

Firebase, Sentry, Git, Figma, Adobe XD, Postman, RevenueCat, Stripe

Methodologies

Agile, Scrum, Code Reviews, Team Leadership
